PROFILE

A collaborative and responsible developer with 6+ years experience in the field of computer technology, capable of communicating cross-functionally, and a creative problem solver and innovative thinker that has a passion and determination to uncover unique things and transform ideas into action with systems-oriented thinking and intelligent planning.

EXPERIENCE

REMOTE FULL-STACK DEVELOPER

ZZAGL

December 2020 - May 2021

- Collaborated cross-functionally with the team and assisted in the development of a website and mobile app for the company (e. g., clients can choose their favorite salon and spa services feature and so on), maintained effectiveness and scalability as well as security, and ensured cross-platform compatibility and optimization (e. g., fixing compatibility issues on both the Android and IOS platforms).
- Diagnose problems, conduct complex technical analyses, and put findings into action. Testing and maintaining the responsive design of applications.
- Used Javascript (ReactJS , React-Native), GraphQL and AWS.

WEB DEVELOPER

LaFamilya Management Consultancy Services

May 2019 - November 2019

- Successfully designed and developed website where it helps manage their day to day key financial tasks / activities and making business registration process become simpler, faster and more efficient (e.g., users can automatically see all the reports and funds of the client on a daily, monthly or yearly basis and etc.).
- Improved and successfully developed new database that helps users retrieve data effectively and securely on a daily basis (e.g., integrates their previous MS Access database to MySQL database for optimization and scalability).
- Used PHP (Laravel) and MySQL

IT STAFF

STATFORD INTERNATIONAL SCHOOL

April 2014 - April 2017

- Led systems integrations, kept software and hardware up-to-date, backed up and secured databases, ensured network stability and provided support to employees.
- Trained students about the basic and advance computer skills that would help them to gain knowledge about technology and make it useful on their work and lives.
